

Flexabed Hi-Low SL

The ideal bed for those in home healthcare, or assisted living environments, the Hi-Low SL can be raised and lowered vertically with a touch of a button — making the Hi-Low SL model ideal for customers who require additional assistance when entering or exiting the bed and for adjusting the bed to a comfortable working height for care-takers to provide proper care for the bed occupant.

The Hi-Low SL also allows couples who require different features in their beds to still be able to sleep in the same bed. Instead of one spouse being forced to sleep separately in a hospital bed, a Flexabed Hi-Low SL can be paired with a Premier or Value-Flex bed allowing spouses to share the same top sheets and comforter!

The Flexabed Hi-Low SL offers many of the same features as a hospital bed but also offers the luxury and comfort of an adjustable bed. If you need relief from the symptoms of injury, chronic pain or illness, or are coming home after a surgery, there's nothing more refreshing than an adjustable bed. You can raise or lower your head and feet to find your favorite position. The Flexabed Hi-Low SL is the best way to provide you or your loved one the most comfortable bedding solution for home use that a traditional flat bed or hospital bed cannot provide.

Every Hi-Low SL model comes with

- a limited lifetime warranty.
- your choice of one-touch wireless or wired remote.
- whisper-quiet motors with optional dual timed massage and optional under-bed lighting.
- a 6 inch foundation profile, high-density, heavy duty padded base made with Advantech® material that will not warp, break or squeak.
- a Premier mattress featuring a beautiful knit fabric quilt panel with a tack and jump pattern and a stylish knit border with designer taped edges. It is thicker and more luxurious than ever before. Choose from several different mattress constructions.
- optional Bluetooth connectivity which allows compatible smartphones the ability to control the bed.
- a cover for the mattress retainer bar at the foot of the bed.
- the ability to be paired with a Flexabed Premier or Value-Flex — perfect for a spouse.
- factory-installed mounting plates for easy installation of side rails at the head and the foot of the bed.
- locking casters or leg pads.
- optional side rails with protective covers.

The Flexabed Hi-Low SL is available in several different standard sizes and lengths. Custom sizes are also available*. Mattresses are also available in several different constructions that are tailored to fit your individual needs. See page 9 for a complete listing of specific bed dimensions and heights. (*Additional charges apply on custom orders and custom sizes are non-returnable.)

A Flexabed adjustable bed should not be considered an alternative to a hospital bed. A physician should be consulted when health issues are involved as to the appropriateness of an adjustable bed.

EASE OF USE

How This Model Works

1. Ease onto the bed with both feet on the floor.

The Flexabed Hi-Low SL can be lowered to a height that allows easy transfer in and out of the bed. Optional side rails can be added that also serve as a lift assist during transfer. Fully raise the head section of the bed with your remote during transfer which allows the occupant to swing their legs in or out of the bed without having to support the weight of their torso.

2. Raise the bed vertically with the touch of a button.

Being able to raise or lower the bed vertically allows the user to adjust the bed to a height that makes transfer in or out of the bed easiest on them. For users who have a caretaker, a Hi-Low SL bed allows the caretaker to adjust the bed vertically to a comfortable working height to assist the occupant with feeding, changing, adjustment, etc.

3. Find the most comfortable position for you.

Raise or lower your head and feet with our whisper quiet dual motor technology and activate the optional dual timed massage featuring wave and pulse technology at your back and legs. Relax and enjoy.

Hi-Low Bed Heights

Height Fully Lowered

	With Leg Pads	With Casters
Floor To Top of Foundation (no mattress)	11"	13.25"
Floor To Top of Low Profile Mattress	16.5"	18.75"

Height Fully Raised

	With Leg Pads	With Casters
Floor To Top of Foundation (no mattress)	18.5"	20.75"
Floor To Top of Low Profile Mattress	24"	26.25"
Floor To Top of Quilted Top Mattress	28-1/8"	30-3/8"
Floor To Top of Gel Mattress	28.5"	30.75"

SOFT AND SUPPORTIVE

Select Your Mattress

Our complete lineup of mattress constructions feature a beautiful knit fabric quilt panel with a designer border and taped edges. The plush, multi-layered, quilted cushion-tops are made with hi-density, super-soft polyurethane foam and flame-resistant polyester fiber, while the bottom layers are protected by a non-skid material that prevents the mattress from sliding across the adjustable foundation and provides a flame-resistant barrier. Our gel-foam mattresses feature smooth-top zipper covers to keep you as close to the cooling gel as possible. Our mattresses are thicker and more luxurious than ever before.

Premier and Hi-Low SL foundations can be paired with any of our mattress constructions listed below. Value-Flex foundations are available only in a soft, medium or firm innerspring construction.

Select Your Preferred Mattress Type

Innerspring

Our traditional innerspring mattresses are available in soft, medium and firm.

Innerspring/Memory Foam Combination*

We combine the traditional support of innerspring with the luxury of memory foam.

Memory Foam Core*

"Melt" into a memory foam mattress with 2 inches of gel-infused memory foam that cradles every curve and pressure point on your body.

Gel Memory Foam*

3 inches of smooth-top, gel-infused memory foam creates a cooler sleeping surface for a refreshing, rejuvenating sleep.

Latex*

Our natural latex provides the soft feel and dynamic support of a luxurious, custom-molded mattress.

Low Profile*

Our low profile mattress reduces overall bed height by approximately 5 inches.

* Only available with Premier and Hi-Low SL models.

Select from 14 stock sizes with unlimited custom dimensions available.

ACCESSORIES

Customize Your Bed

We make every bed by hand in our LaFayette, Georgia factory.

So not only do you get excellent craftsmanship, you have a partner who can add just the right accessory or specification to satisfy your request. Some customers prefer their Flexabed a little higher off the floor. Others ask for an easier way to change the sheets. Whatever your needs or requests, Flexabed can most likely accommodate them.

Side Rails

Side rails provide added security while you sleep. They fold away when not in use.

Each bed can accommodate up to four side rails (2 at the head and 2 at the foot for complete bed coverage). The Premier must be ordered with a 2 inch foundation profile to be used with side rails.

Side Rail Covers

These cushion the rails and feature a large pocket for conveniently storing your bed controller, eyeglasses, magazines, and more.

Leg Extensions

To set a custom bed height that matches the height of your existing bedroom furniture, leg extensions can be added to adjust the top of the mattress from the floor. The height of the bed can be raised in 1 inch increments from 2 to 7 inches. Leg extensions can not be used on the Hi-Low SL model.

Lower Bed Heights

When needed, you can lower the height of any Flexabed model 2.25 inches by removing the casters.

Massage

Add dual-speed vibration to your Flexabed for a soothing effect to help when you have a muscle tension or need assistance relaxing to fall asleep.

Lighting

Under-bed lighting illuminates the floor space around your Flexabed so you can see any obstructions blocking a path to the bathroom in a darkened bedroom.

Notes About Hi-Low SL Bed Heights

Continued from Page 7.

1. A caster adds 2.25" of height over a leg pad.
2. All mattresses are subject to a tolerance of +/- 1/4".
3. All mattress measurements are measured to the crest. If measuring to the tape edge, reduce the measurement by 1".
4. Hi-Low SL beds raise vertically 7.5" and also travel horizontally 7.5" towards the foot-end of the bed.
5. The head section of the bed lifts to angle of 73°.
6. The foot section of the bed lifts to an angle of 40°.
